

CONTROLS

- Variable LFO rate
- Variable Pitch
- Variable modulation depth
- 3 waveform
- Automatic/manual switch
- Launch Siren button (black)
- Launch 4 samples (Green)
- Select samples Bank (switch L - G - A)

SAMPLER

Supports FAT16, FAT32 file system, maximum support 32GB micro SD card (512MB SD card included)
3 banks of 4 sounds each (12 total)

UPLOADING FILES TO THE MICRO SD CARD

Simply drag the files (mp3 or 24 bit wav) to the sd memory folder.

The files are organized depending on the order in which they were copied to the card, NOT according to the name they have, from 1 to 4 are in bank L, from 5 to 8 in G, and from 9 to 12 in A.

POWER

You can power the Siren through a USB-A to USB-C cable and a cellphone charger, power bank or your computer. We recommend the use of 5v and 4.5A Charger for better performance.

DESIGN

La Golden Acapulco is a famous plant mentioned in *Los Detectives Salvajes*, the classic novel by Roberto Bolaño. This device is illustrated by Pablo Delcielo inspired in the *Knock-offs* you can find on street markets.

Circuit and programming by **Daniel LLermaly**
